ah A header with leading empty lines
ih Inner header without leading empty lines
vah Select header with contents
dah Delete header with contents
yah Change header with contents

Internal Links

TextText WikiWord
!TextText Limit linking of WikiWord
[[Text text]] Link with spaces
[[Text text | Text]] Link with description

External links

plain link: <http://site/>
link with description [\[http://site/ home page\]](http://site/ home page)
plain link to image <http://site/pic.jpg>
link to local image [\[\[images/pic.jpg\]\]](#)¹
double bracketed link [\[\[http://site/pic.jpg\]\]](#)
link with description [\[\[http:|comment\]\]](#)
link with alternate text [\[\[http:|comment|\]\]](#)

links with some style:

with alternate text:

[\[\[http:|cool|width:150px; height:120px;\]\]](#)

without alternate text:

[\[\[http:|width:150px; height:120px;\]\]](#)

thumbnail links:

[\[http://site/pic.jpg http://site/thumb.jpg\]](#)

[\[\[http://site/pic.jpg|http://site/thumb.jpg\]\]](#)

Lists

Indent list items with at least one space.

* item bulleted list
item numbered list
term:: definition definition list

Paragraphs and Preformatted text

Paragraphs start from column one, no indentation and are divide by a blank line. If the line starts from whitespace and is not a list it is "preformatted" text.

Tables

|| Separator of cells
|| Center || Spaces left and right – center align
|| Left || No spaces left – left align
|| Right || No spaces right – right align

Folding/Outline

zM close all folds
zr reduce folding one level
zR open all folds
Folding on list items should work properly only if all of them are indented using current *shiftwidth*.
